**Subject:** Fwd: Fruitland Mg Fire effluent air consult.

Hi Charles,

As I mentioned on the phone, EPA OSC Jason Musante's information is below and I copied him in this email.

He is requesting assistance and consultation with ATSDR regarding EPA setting its action level for total particulates during removal activities. The removal is for dust and debris generated at a metal recycle facility in Maywood California. The contaminants of concern are lead and possibly chromium. Jason will have more details.

I am on leave until October 26. Please contact Jason and keep Ben Gerhardstein in the Region 9 office included.

Libby Vianu
